

14-Inch Television Main Chassis PCB

This is a main chassis PCB used in Sanyo 14-inch televisions. The main printed circuit board is populated with electronic components and features a flyback transformer.

Overview

Professional CRT Television Chassis

This 14-inch television main chassis PCB is a comprehensive electronic solution designed for CRT display systems. It features a fully populated main printed circuit board with high-quality capacitors, resistors, and integrated circuits to ensure stable performance. The assembly includes essential components such as a flyback transformer and dedicated wiring harnesses for seamless integration.

Technical Specifications

Display Compatibility

14 Inch

Screen Size Support

Chassis Type

CRT Television • Main Chassis • PCB Assembly

Component Details

Integrated Components

- Flyback Transformer
- Integrated Circuits (ICs)
- Capacitors and Resistors
- Connectors and Wiring Harnesses
- Secondary Control PCB

Functional Modules

Deflection Control, Convergence Support, Signal Processing
