

# 1/4 Inch x 100 Foot Twisted Polypropylene Rope

This 1/4 inch diameter twisted polypropylene rope is 100 feet in length. It is constructed from weather-resistant polypropylene fibers, offering strength and longevity for boating, camping, tie-downs, and general use.

## ADDITIONAL IMAGES

## Overview

### Versatile Utility Rope

This 1/4 inch x 100 foot twisted polypropylene rope is engineered for durability and strength across a wide range of applications. Its unique blend of polypropylene and polyester fibers ensures excellent resistance to weather, rot, and UV damage, making it ideal for both marine and general utility use. The lightweight, buoyant design combined with a twisted construction provides superior grip and knot-holding ability for professional and recreational tasks.

## Key Metrics

### Physical Dimensions

**0.25 in**  
Diameter

**100 ft**  
Length

## Material & Construction

Material Composition	Polypropylene, Polyester
Construction Style	Twisted / Hollow Braid

## Performance Features

### Environmental Resistance

Waterproof • Buoyant • UV Resistant • Rot Resistant • Mildew Resistant • Chemical Resistant

### Handling Properties

- Lightweight for easy transport
- Enhanced grip surface
- Excellent knot-holding ability
- Abrasion resistant

## Applications

### Recommended Uses

- Boating and Marine
- Camping and Outdoor
- Tie-downs
- General Utility
- Crafting
