

# 14-Liter Thermoelectric Cooler and Warmer

This thermoelectric device functions as both a mini cooler and warmer with a 14-liter capacity. Constructed from ABS, it cools to 18°C-22°C below ambient or heats to 60±5°C, indicated by LED lights.

## Overview

### Versatile 14-Liter Thermoelectric Solution

This 14-liter thermoelectric unit serves as a dual-function cooler and warmer, perfect for offices, homes, and mobile environments like cars. Engineered with durable ABS plastic, it features a reliable thermostat for precise temperature control. Whether for camping, picnics, or daily office use, this unit provides consistent performance across multiple power sources.

## Technical Specifications

Volume Capacity	14 Liters
Cooling Capacity	18°C-22°C below ambient temperature
Heating Capacity	60 °C
Construction Material	ABS
Supported Power Supplies	AC230V, DC12V

## Operational Features

### Status Indicators

- Green LED for Cooling mode
- Red LED for Warming mode

## Logistics

### Container Loading Capacity

Container Size	Quantity (pcs)
20' Container	458
40' Container	950
