

14-Liter Thermoelectric Mini Cooler and Warmer

This thermoelectric mini cooler and warmer has a 14-liter capacity and is made from ABS material. It can cool to 18°C-22°C below ambient temperature and heat to 60±5°C, with green/red LEDs indicating cooling or warming.

Product Overview

Versatile Thermal Management

The 14-liter thermoelectric mini cooler and warmer is designed for seamless climate control in various settings, from offices and homes to vehicles and outdoor excursions. It features dual-function capability, capable of cooling up to 22°C below ambient temperature or warming up to 65°C via a precise thermostat. Constructed from durable ABS material, this compact unit offers reliable performance for both storage and transport needs.
