

14-Liter Thermoelectric Mini Cooler and Warmer

This thermoelectric mini cooler and warmer has a 14-liter capacity. Constructed from ABS material, it cools 18°C-22°C below ambient temperature and heats to 60±5°C, with LED indicators for cooling or warming.

Product Overview

Versatile Temperature Control

The 14-Liter Thermoelectric Mini Cooler and Warmer is a high-performance solution for maintaining optimal food and beverage temperatures. Designed for versatility, this unit features both cooling and warming modes, making it suitable for a variety of environments from offices to vehicles. Its robust ABS construction ensures long-lasting reliability for daily use in home, camping, or travel settings.

Technical Specifications

Internal Volume	14 L
Body Material	ABS
Cooling Capacity	18°C-22°C below ambient temperature
Heating Capacity	60 °C
Power Compatibility	AC 230V, DC 12V

Features

Recommended Use

- Office
- Home
- Car
- Picnic
- Camping
