Overview

High-Performance Agricultural Tractor

This 140 HP agricultural tractor is engineered for dry fields and multifunctional applications, combining European-inspired technology with robust construction. It features a powerful 6-cylinder EFI engine and a sophisticated 30F+30R power shift transmission for smooth operation. Designed for operator comfort and productivity, the unit includes a car-class cabin, advanced digital diagnostics, and heavy-duty components sourced from global industry leaders.

Engine & Performance

Emission Standard

Euro III

Engine Configuration	6-cylinder high-pressure common rail (EFI)
Torque Reserve Coefficient	35 %
Maximum Traction Force	42 kN

Transmission & Drivetrain

Gearbox Configuration	30F+30R power shift
Transmission Mechanism	Helical gear transmission
Bearing Manufacturers	SKF, INA, KOYO

Hydraulics & PTO

PTO Rotation Speeds

- 540
- 760
- 1000

Maximum Lifting Force	28 kN
-----------------------	-------

Hydraulic Output Groups	3
-------------------------	---

Technical Specifications

Fuel Tank Capacity	160 L
--------------------	-------

International Standards	OECD, EAC, E-mark
-------------------------	-------------------
