

# 140cc Air-Cooled Diesel Engine

This robust diesel engine is designed for industrial and agricultural use. Its single-cylinder, air-cooled, four-stroke design ensures dependable performance and fuel efficiency.

## Overview

### Reliable Industrial Power

The 140cc Air-Cooled Diesel Engine is a robust power solution designed for demanding industrial and agricultural environments. Built with a single-cylinder, four-stroke design, it delivers consistent performance and fuel efficiency for various machinery. Its durable construction, featuring a cast iron cylinder liner and heavy-duty crankshaft, ensures an extended service life even in challenging conditions.

## Technical Specifications

Displacement	140 cc
Cooling System	Air-cooled
Engine Type	Single-cylinder, 4-stroke
Fuel Injection	Direct injection

## Features

### Key Construction Features

- Cast iron cylinder liner
- Heavy-duty crankshaft
- Efficient air filtration system

## Applications

Compatible Machinery	Water Pumps, Generators, Tillers
