

14.4V Cordless Drill with Adjustable Clutch

This cordless drill operates on a 14.4V Li-ion battery, providing power and portability. It features an adjustable clutch and variable speed trigger for controlled drilling and driving.

Product Overview

High-Performance 14.4V Cordless Drill

This 14.4V cordless drill is designed for professional portability and power, utilizing Li-ion battery technology for consistent performance. It features an adjustable clutch with multiple torque settings to prevent overdriving and a variable speed trigger for precise control across various materials. The ergonomic design and keyless chuck system ensure efficiency and comfort during demanding drilling and fastening tasks.

Technical Performance

Voltage

14.4 V

Operating Voltage

Battery Technology

Li-ion

Operational Features

Clutch Type	Adjustable clutch with multiple settings for precise torque control
Speed Control	Variable speed trigger
Chuck System	Keyless chuck for quick bit changes

Design & Ergonomics

Key Benefits

- Ergonomic design for extended use
- Portable cordless operation
- High level quality construction

Handling	Yes
