Product Overview

High-Efficiency LiFePO4 Charging Solution

This professional-grade 14.6V 10A LiFePO4 battery charger is designed for rapid and reliable power delivery. Featuring an intelligent dual-color LED status indicator, it provides clear visual feedback for charging and full-capacity states. Built for versatility, it supports a wide universal input voltage range and is engineered for optimal performance with 4-series lithium iron phosphate battery packs.

Technical Specifications

Output Metrics

14.6 V

Output Voltage

10 A

Output Current

| | |
|---------------------|---------------------|
| Model Number | JCG150F-146100 |
| Input Voltage Range | 100-240VAC, 50/60Hz |
| Max Input Current | 3 A |

Features

Charging Indicators

- Red LED: Charging
- Green LED: Fully Charged

Compliance
