

14.6V 20A LiFePO4 Battery Charger

This is a high-performance LiFePO4 battery charger designed for 12V 4S battery packs. It provides a charging voltage of 14.6V and a maximum charging current of 20A.

Overview

High-Efficiency LiFePO4 Charging Solution

The C600 is a high-performance battery charger specifically engineered for 12V 4S LiFePO4 battery packs, delivering a robust 20A output. Housed in a durable aluminum alloy casing, it offers fast charging and high efficiency for demanding B2B applications. This versatile charger is an ideal power solution for electric motorcycles, scooters, and e-bikes, ensuring reliable performance in international markets.

Technical Performance

High-current 20A charger optimized for 12V 4S Lithium Iron Phosphate battery configurations.

Key Performance Metrics

14.6 V Output Voltage	20 A Output Current	300 W Output Power
---------------------------------	-------------------------------	------------------------------

Input Voltage

- 110-132VAC
- 200-264VAC

Compatible Battery Types

LiFePO4, Lipo, Lead Acid

Physical Characteristics

Enclosure Material	Aluminium Alloy
Dimensions	135 x 90 x 50 mm
Net Weight	0.9 kg

Application & Standards

Primary Applications

- Electric Motorcycle
- Scooter
- E-bike

Certifications

CE • RoHS

Socket Standard	Customizable to any country standard
Warranty Period	12 Months
