

# 14.6V 5A LiFePO4 Battery Charger for E-bikes

This battery charger is designed for LiFePO4 batteries, providing an output of 14.6V at 5A. It features LED indicators to display charging status and includes safety features.

## ADDITIONAL IMAGES

## Product Overview

### Professional LiFePO4 Charging Solution

This S120 series charger provides a reliable 14.6V and 5A output, specifically engineered for 4S LiFePO4 battery configurations. Housed in a durable aluminium alloy shell, it is designed for efficiency and thermal management in various mobility and cleaning equipment applications. With its universal input voltage compatibility, it is an ideal solution for international B2B integration in E-bikes, scooters, and golf carts.

## Technical Specifications

### Performance Metrics

<b>14.6 V</b> Output Voltage	<b>5 A</b> Rated Current	<b>73 W</b> Output Power
---------------------------------	-----------------------------	-----------------------------

**Input Voltage Range** 110-132VAC / 200-264VAC

**Battery Compatibility** LiFePO4, 4S

## Physical Characteristics

**Dimensions** 137 x 90 x 51 mm

**Weight** 0.8 KG

**Shell Material** Aluminium Alloy

## Compliance & Support

### Certifications

CE

**Warranty** 12 Months

## Application

### Applications

- Electric Bike
- Motorcycle
- Scooter
- Cleaner Equipment
- Golf Cart
