

# 148Wh Portable Solar Power Station

This portable power station provides reliable power for electronics and small appliances. It features a 148Wh battery, multiple output ports such as AC, USB, and PD, and an integrated display.

## Overview

### Portable Energy Solution

This 148Wh portable power station is engineered to provide reliable energy for a variety of electronic devices and small appliances. Designed with both portability and performance in mind, it serves as an excellent power source for camping trips, outdoor recreational activities, and emergency backup situations. The unit features an integrated display for real-time monitoring of battery levels and operational status, ensuring you always have the power you need when away from the grid.

## Technical Specifications

### Battery Capacity

**148 Wh**

Capacity

### Output Ports

- AC Outlet (100W)
- USB Ports (5V 3.1A)
- QC3.0 Port
- PD45W Input/Output Port

Charging Input	15 V
Input Current	2.4 A

## Features

### Interface Features

Integrated Display • Multiple Output Ports • Portable Design

Ideal Use Cases	Camping, Outdoor Activities, Emergency Backup
