Overview

14A/14B Standard Lampholder

The 14A/14B lampholder is a professional lighting component engineered to provide a secure and stable connection for light bulbs in residential and commercial environments. Designed for durability, it utilizes high-quality materials including ABS, bakelite, and ceramics to ensure heat resistance and longevity. Its robust construction and reliable electrical contacts make it an ideal choice for various standard lighting installations.

Technical Specifications

Internal Components

- Copper parts
- Aluminum lamp coil

Available Models

14A • 14B

Materials

ABS, Bakelite, Ceramics
