Product Overview

Precision-engineered replacement plunger for construction excavators.

High-Performance Fuel Injection Plunger

This precision-engineered plunger is designed specifically for C7 and C9 fuel injection pumps. It is a critical component for construction machinery, ensuring efficient fuel delivery and sustained engine performance. Available in 14mm and 14.5mm configurations, it provides durability and reliability for demanding excavator applications.

Technical Specifications

Weight per unit	0.08 kg
Available Diameters	14mm, 14.5mm
Construction Material	Steel
System Requirements	7 pieces required for one pump
