Product Overview

High-Performance Automotive Alternator

This high-performance automotive alternator is engineered to deliver reliable electrical power for demanding vehicle applications. Designed for seamless integration, it converts mechanical engine energy into consistent electrical output to support battery charging and vehicle accessory operation. Its robust construction ensures durability and efficient heat dissipation under varied operating conditions.

Technical Specifications

Electrical Performance

14 V

Rated Voltage

120 A

Rated Current

Model Number

JFZ1120

Serial Number

A1AA20008

Compatibility

Compatible Engine Series

- Cummins ISF 2.8
- Diesel Engines

Compatible Vehicle Models

GAZ Gazell, FOTON, JAC, HOWO
