Product Overview

High-Performance Steel Tubeless Wheel Rim

This 14X6.5J steel tubeless wheel rim is engineered for high load-bearing capacity and structural integrity. Manufactured using advanced submerged welding technology, it offers superior welding quality and long-term durability. It is specifically designed to provide a reliable fit for a variety of light commercial vehicles and trucks, ensuring stability and performance under demanding operating conditions.

Technical Specifications

Rim Dimensions	14X6.5J
Tire Compatibility	Tubeless
Ventilation	10 circular holes
Bolt Hole Count	8

Vehicle Compatibility

Compatible Vehicle Models

- D-MAX
- NKR
- VIGO
- TOYOTA MIGHTY
- ISUZU-ELF
- NISSAN NAVARA

Quality & Manufacturing

Manufacturing Standards	High Tensile Steel, Submerged Welding, Tubeless System
