

15" 1500W Three-Way Full-Range Self-Powered Speaker

This 15" 1500W three-way, full-range, self-powered speaker is designed for full-range live sound reinforcement applications with or without a subwoofer. The integrated Class-D amplifier provides ample power for demanding audio environments.

Overview

Professional Three-Way Audio Solution

This self-powered, three-way loudspeaker system is engineered for high-performance sound reinforcement in demanding environments. Featuring a 15-inch woofer, 6.5-inch midrange transducer, and 1.5-inch compression driver, it delivers exceptional clarity and high sound pressure levels. The integrated Class-D amplification and comprehensive DSP ensure consistent, reliable audio quality for live sound, music playback, and speech applications.

Technical Specifications

Power Output

1500 W

Amplifier Power

Transducer Configuration

- 15-inch Differential Drive woofer
- 6.5-inch midrange transducer
- 1.5-inch neodymium compression driver

Connectivity & Control

Input Connections	XLR, 1/4-inch combo jacks
DSP Features	Yes

Build & Design

Enclosure Material	Durable plywood
Finish	DuraFlex coating

Applications

Recommended Applications

Live Sound Reinforcement • Music Playback • Speech Applications • Monitor Applications
