Overview

Compact Power and Efficiency

This 1.5-1.6 ton wheel loader is engineered for versatility, combining a robust frame capable of handling heavy loads with a highly maneuverable design. Featuring a comfortable, vibration-absorbing cabin and intuitive pilot joystick controls, it is built to minimize operator fatigue during long shifts. With high-dumping clearance and a quick-hitch system, this machine is an ideal solution for construction, landscaping, and material handling tasks in both tight spaces and open areas.

Performance

Payload Capacity

1.6 ton

Max Payload
