

1.5 HP AC Induction Motor 220V

This AC induction motor is a 1.5 HP motor operating at 220V. It is suitable for pumps, fans, compressors, and other machinery requiring constant speed operation.

Product Overview

Industrial-Grade Induction Motor

This YE2 series three-phase asynchronous motor is engineered for reliable performance in demanding industrial environments. Constructed with 100% copper windings, it ensures efficient energy conversion and long-term durability. It is an ideal solution for powering machinery such as pumps, fans, and compressors that require consistent speed and power output.

Technical Specifications

Key Performance Metrics

1.5 HP

Rated Power

220 V

Voltage

Supported Mounting Types

- B3
- B5
- B35
- B14
- B34

Compliance & Quality

Efficiency Standard

IE1 • IE2

Certifications

CCC, CE, ISO 9001:2015, GB/T 19001-2006
