

1.5 HP Three-Phase AC Motor, 90 Frame, 1400 RPM

This three-phase AC motor outputs 1.5 horsepower and operates at 1400 RPM. Encased in a 90 frame, it is compatible with 220V and 380V power systems.

Product Overview

Industrial Three-Phase Performance

This YE2 series three-phase asynchronous motor is engineered for reliability in demanding industrial environments. With a 1.5 HP output and 1400 RPM performance, it provides consistent rotational power suitable for HVAC systems, pumps, compressors, and industrial fans. Built to global quality standards, this motor features 100% copper windings for enhanced durability and efficiency.

Technical Specifications

Rated Power

1.5 HP
