

# 1.5 Inch Gasoline Floating Water Pump

This 1.5 inch gasoline floating water pump is designed for versatile and portable water transfer. Its floating design allows operation in shallow or difficult-to-reach water sources, making it suitable for irrigation, drainage, and emergency water removal.

## ADDITIONAL IMAGES

## Product Overview

### Versatile Floating Water Pump

The 1.5 Inch Gasoline Floating Water Pump is a highly portable and efficient solution designed for versatile water transfer needs. Its unique floating design allows for operation in shallow or difficult-to-reach water sources, making it an excellent choice for agricultural irrigation, drainage, and emergency water removal. Powered by a reliable gasoline engine, this pump is built for durability and ease of use in both professional and domestic environments.

## Technical Specifications

Pump Size	1.5 inch
