

1.5-Pole 24V 30A Magnetic AC Contactor

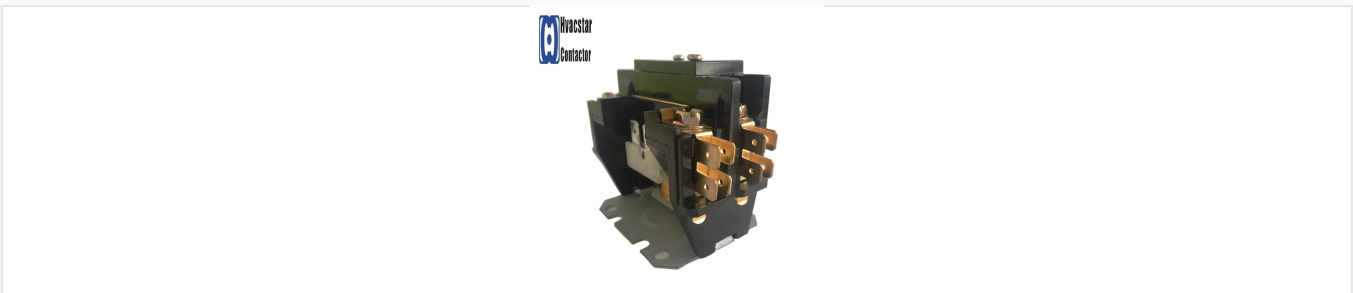

This 1.5-pole magnetic AC contactor is designed for household applications. It operates on a 24V coil voltage and is rated for 30 Amps.

ADDITIONAL IMAGES

Overview

A 1.5-pole magnetic AC contactor designed for HVAC&R applications, featuring robust construction for reliable switching.

High-Performance Magnetic AC Contactor

This 1.5-pole magnetic AC contactor is engineered for reliable switching in HVAC and refrigeration applications. Built with high-quality silver cadmium oxide contacts, it ensures durability and consistent performance under demanding electrical loads. The unit is fully certified to meet international safety standards, making it a dependable choice for residential and light commercial equipment.

Electrical Specifications

Coil Voltage	24 VAC
Full Load Amps (FLA)	30 A
Resistive Amps	40 A
Number of Poles	1.5

Performance Metrics

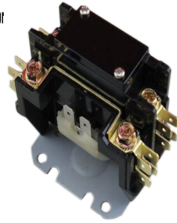

Locked Rotor Amps (LRA)

180 A
at 240V

150 A
at 480V

120 A
at 600V

Physical and Environmental

The compact design allows for easy integration into residential and commercial air conditioning and refrigeration systems.

Operating Temperature	-40°C to +65°C (-40°F to +150°F)
Termination Type	#10-32 screw
Contact Material	Silver Cadmium Oxide

Compliance

The product meets strict safety standards including UL, CSA, and CE certifications for reliable global operation.

Certifications

UL Listed • CSA • S MARK • CCC Approved
