Overview

Heavy-Duty Cargo Solution

The 1.5-Ton Gasoline Cargo Tricycle is a robust, heavy-duty transport vehicle engineered for demanding industrial and agricultural environments. Featuring a powerful 200cc air-cooled engine and a reinforced chassis, it offers reliable performance for hauling loads up to 1500kg. With a spacious cargo box and durable suspension system, this tricycle provides a stable and efficient solution for material transport across various terrains.

Performance & Engine

Engine Specifications

200 cc

Engine Displacement

1500 kg

Load Capacity

Engine Details

- 1 Cylinder, 4 Stroke
- Air Cooled
- C.D.I Ignition
- Electric/Kick Starter

Transmission

5 Forward + 1 Reverse

Chassis & Suspension

Suspension System

- Front: Giant mountain type absorber
- Rear: New design strong 7-piece suspension

Chassis Dimensions	40*80 keel and 40*80 chassis
--------------------	------------------------------

Rear Axle	Full floating, 220mm drum
-----------	---------------------------

Cargo & Dimensions

Cargo Box Dimensions	1.9m x 1.35m
----------------------	--------------

Cargo Box Features	Flowered bottom, 700mm high engineering box
--------------------	---

Tire Size	5.00-12
-----------	---------

Features & Comfort

Additional Features

Luxury sunshine proof canopy • Big passenger seat • 28A Battery
