Overview

High-Performance Agricultural Tractor

This 150 HP 4WD tractor is designed for dry land and multifunctional agricultural applications, utilizing advanced European technology. It features a high-torque engine with a torque reserve coefficient of at least 30% and a robust traction force of 31KN. With a 16F+8R synchronized gear system and a heavy-duty chassis, it offers both reliability and ease of operation for demanding farming tasks.

Technical Specifications

Transmission: Synchronizer 16F+8R gear

Fuel Tank Capacity: 255 L

Hydraulics & PTO

PTO Rotation Speed

- 540
- 1000

Maximum Lifting Force: 23 KN

Hydraulic Output: Three-way

Compliance & Features

Certifications

OECD • EAC • E-mark

Emission Standard

Euro II

Optional Features

Internal air filter, External air filter, Upper exhaust, Single pipeline air brake, Double pipeline air brake
