

1500 HP Land Drilling Rig for Petroleum Prospecting

The 1500 HP land drilling rig is a robust solution for petroleum prospecting. Engineered for efficient performance, it's suitable for various wells, featuring advanced controls and safety features.

Product Overview

High-Performance Land Drilling Rig

This 1500 HP land drilling rig is a robust and versatile solution engineered for petroleum prospecting engineering. Designed for efficient performance in diverse land-based operations, it features a high-capacity drawworks system, a powerful mud pump, and a sturdy mast and substructure. Its modular design ensures easy transportation and assembly, making it a reliable choice for remote exploration, production, and injection well projects.

Technical Specifications

Power Rating

1500 HP

Power

Core Components

- High-capacity drawworks system
- Powerful mud pump system
- Sturdy mast and substructure
- Advanced control systems

Operational Capabilities

Key Features

Modular Design • Easy Transportation • Advanced Safety Systems • Remote Location Ready

Well Types

Exploration, Production, Injection
