

15000 lbs Hydraulic Winch with Manual and Air Clutch

This hydraulic winch has a maximum working load of 6504KGS, approximately 15000 lbs, providing substantial pulling force. It is equipped with both a manual clutch shifter for precision and an air clutch shifter that requires 6 bar of air pressure.

Product Overview

High-Performance Hydraulic Winch

This 15000 lbs hydraulic winch is engineered for heavy-duty applications, providing reliable pulling power for various engineering and industrial vehicles. It features a robust design with an IP67 waterproof rating to withstand harsh environmental elements. Equipped with both manual and air clutch systems, it offers versatile control for demanding recovery and lifting tasks.
