

150cc Air-Cooled Motorcycle Engine

This 150cc engine is a robust and efficient power unit designed for two-wheeled vehicles. Featuring a single-cylinder, air-cooled configuration, it delivers optimal power and torque for various riding conditions.

Overview

High-Performance W150 Engine Series

The W150 series is a robust, single-cylinder, air-cooled engine meticulously engineered for two-wheeled vehicles. It balances optimal power and torque with fuel efficiency, making it an ideal choice for both motorcycles and scooters. Designed for longevity, this power unit features a durable crankcase and piston assembly, ensuring consistent performance even under varied riding conditions.

Technical Specifications

Displacement

150 cc

Displacement

Displacement	150 cc Displacement
Cooling System	Air-Cooled
Engine Configuration	Single-Cylinder

Key Features

Design Advantages	Fuel Efficient, Low Emissions, Compact Design, Lightweight, Easy Maintenance
-------------------	--

Construction

Core Components

- Durable Crankcase
- Precision Cylinder Head
- High-Strength Piston Assembly
