

# 150cc Air-Cooled Motorcycle

This 150cc motorcycle features a single-cylinder, air-cooled engine for efficient performance. The bike includes a comfortable seat, responsive handling, and a classic design.

## ADDITIONAL IMAGES

## Overview

### Ergonomic Urban Commuter

This 150cc air-cooled motorcycle is designed with ergonomics at its core, featuring a high handlebar and low saddle to promote a comfortable, fatigue-reducing riding posture. Engineered for both efficiency and enjoyment, it includes a labor-saving clutch lever, vibration-absorbing pedals, and a carefully tuned damper system. Built with a high-strength steel frame, this motorcycle offers a reliable and safe riding experience for daily urban commuting.
