

150cc Gas Scooter with Step-Through Frame

This gas scooter is equipped with a 150cc four-stroke engine, providing sufficient power for navigating city streets. It features a step-through frame design, a single seat, a rear luggage rack, and alloy wheels.

Overview

Sporty Performance for Urban Commuting

The 150cc Gas Scooter offers a blend of performance and convenience with its accessible step-through frame design. Engineered for urban environments, it features a robust 8.8HP engine and automatic transmission, ensuring smooth acceleration and ease of use in city traffic. Its advanced suspension system provides a stable, hovercraft-like ride, making it an ideal choice for daily transport.
