Overview

Built for Heavy-Duty Utility

This 150cc gasoline cargo tricycle is engineered for reliable hauling in demanding environments, from construction sites to agricultural fields. It combines a robust chassis with a powerful air-cooled, 4-stroke engine to deliver consistent performance under heavy loads. With a spacious cargo bed and a stable suspension system, this vehicle is designed to maximize efficiency and durability for daily commercial operations.

Performance

Engine Performance

150 cc

Engine Displacement

1

Cylinder Count

4 stroke

Stroke Type

Transmission

5 Forward + 1 Reverse

Ignition & Starting

C.D.I Ignition, Electric Start, Kick Start

Chassis and Suspension

Suspension System

Component	Specification
Front Absorber	Dragon #43
Rear Suspension	Steel Plates 7+2

Chassis Dimensions

40mm x 80mm

Cargo and Capacity

Load Capacity	800 kg
Cargo Box Dimensions	1.8m x 1.3m (Flowered bottom)

Technical Details

Tire Size	5.00-12
Rear Axle	4 Bolts, 180 Drum
Battery	9 Ah
