Overview

Advanced Urban Mobility

This 150cc scooter is engineered for efficient urban commuting, featuring a high-compression water-cooled engine and an advanced CVT transmission. It integrates modern smart technology including a keyless start system, real-time CAN communication, and GPS/4G connectivity for a seamless rider experience. With a suite of safety features like dual-channel ABS and traction control, it offers a stable, secure, and comfortable journey for daily travel.

Engine & Performance

Engine Metrics

11.8 kW

Power Output

15 N.m

Max Torque

12 :1

Compression Ratio

Engine Technologies

Four-valve structure, Water-cooling, Pure aluminum cylinder, DLC coated piston ring, Dual-channel ABS

Technology & Smart Features

Connectivity & Control

- Keyless control system with CAN communication
- 4G and GPS integration
- Bluetooth connectivity
- Smartphone application support
- Auto start-stop function

Instrument Panel

TFT full-color IPS LCD with four selectable themes

Safety & Comfort

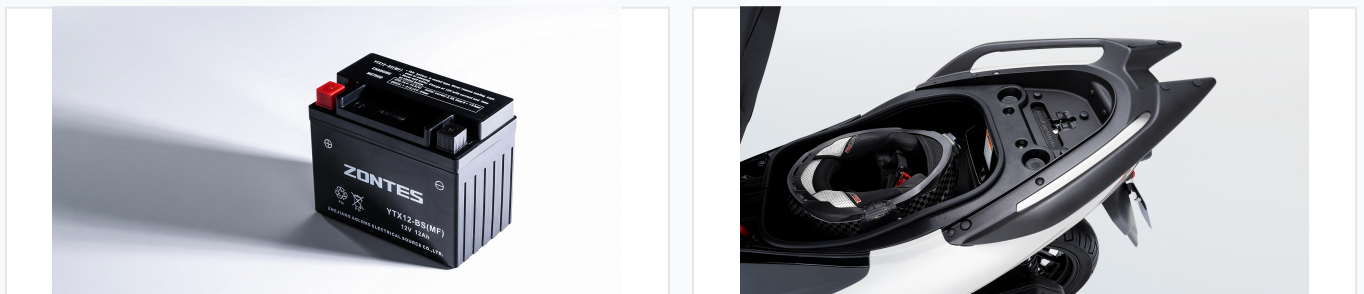

Safety Systems

Traction Control System (TCS) • Dual-channel ABS • Tire Pressure Monitoring • LED Lighting

Suspension System

Component	Size/Type
Front Shock	35mm positive
Rear Shock	30mm double-barrel

Specifications

Fuel Tank Capacity

12 L

Battery

12V 12Ah high-capacity sealed battery

Storage

Yes
