

150cc Motorcycle with Balance Shaft

This motorcycle features a newly designed fuel tank for a fashionable look. It is equipped with a long stroke, large torque, built-in balance shaft engine, which provides low vibration, strong acceleration, and low fuel consumption.

Overview

Designed for Performance and Comfort

This 150cc motorcycle features a newly designed, fashionable fuel tank and a robust build suitable for both on and off-road environments. It is powered by a long-stroke engine equipped with a built-in balance shaft, which significantly reduces vibration during operation. The design prioritizes rider comfort, strong acceleration, and high fuel efficiency for reliable daily performance.
