

150kW Power Generating Unit

This 150kW generating unit is designed for reliable power generation in various applications. It features a robust engine coupled with a high-efficiency alternator, ensuring stable and consistent performance.

Overview

Reliable Power Generation

This 150KW generating unit is engineered for dependable power generation across a diverse range of applications. It features a robust engine paired with a high-efficiency alternator to ensure stable and consistent energy output. Equipped with a comprehensive control panel for precise monitoring and management of operational parameters, this unit is built for durability and minimal maintenance, making it an ideal choice for industrial, commercial, and residential backup power needs.
