

150L Air Compressor Tank

This horizontal air compressor tank has a 150L capacity for storing compressed air. The cylindrical tank body is supported by legs and equipped with ports for connecting to air compressors and pneumatic tools.

Product Overview

Industrial Air Storage Solution

This 150L horizontal air compressor tank is designed to provide reliable compressed air storage for various industrial and workshop applications. Featuring a robust cylindrical design with reinforced end caps and stable leg supports, it is built to handle the demands of pneumatic tool operation and machinery. The unit includes multiple ports and fittings, making it a versatile component for integrating into existing air compressor systems.

Technical Specifications

Tank Capacity	150 L
Orientation	Horizontal
Design Features	Cylindrical Body, Rounded End Caps, Multi-Leg Support, Multiple Ports

Condition and Usage

Condition

Pre-owned • Signs of wear • Surface rust

Applications

Suitable Applications

- Powering pneumatic tools
- Tire inflation
- Operating machinery
- Compressed air storage
