

# 150L Vertical Water Tank

This 150L water tank is a vertically-oriented water storage unit suited for residential or light commercial settings. It features standard plumbing connections and an access panel for maintenance.

## Overview

### 150L Vertical Water Tank

This 150L vertical water tank is designed for efficient, reliable hot water storage in residential or light commercial settings. It features a robust inner vessel constructed from BTC340R steel for durability, paired with a galvanized shell for external protection. The unit is optimized for thermal efficiency with integrated insulation, making it a dependable choice for consistent hot water supply.

## Technical Specifications

Capacity	150 L
Inner Vessel Diameter	368 mm
Outer Tank Dimension	450 mm

## Materials & Construction

Inner Vessel Material	BTC340R
Inner Vessel Thickness	1.8 mm
Shell Material	Galvanized sheet
Shell Thickness	0.5 mm

## Performance

### Top Heat Exchanger Surface Area

**40 m<sup>2</sup>**
