

150lb Rising Stem Gate Valve

This 150lb gate valve features a rising stem, offering visual confirmation of its open or closed status. Constructed from durable materials, it ensures longevity and corrosion resistance in various piping systems.

Overview

Industrial Rising Stem Gate Valve

This 150lb Rising Stem Gate Valve is engineered for robust industrial performance, featuring a rising stem design that provides clear visual confirmation of the valve's open or closed status. Constructed from durable cast steel, it is designed to deliver a tight shutoff and minimal pressure drop in demanding piping systems. It is a versatile solution suitable for controlling the flow of water, oil, and gas, making it an ideal choice for applications requiring infrequent operation and a straight-through flow path.

Technical Specifications

Pressure Rating

150 lb

Pressure Class

Body Material

A216 WCB Cast Steel

Valve Type

Rising Stem Gate Valve

Application

Key Performance Features

- Visual position indication via rising stem
- Tight shutoff capability
- Minimal pressure drop when fully open
- Straight-through flow path

Compatible Media

Water, Oil, Gas
