

150mm Segmented Sintered Saw Blade

This blade is used for cutting polished porcelain, ceramic, rustic, glaze floor, and wall tiles. It offers high sharpness, flat cutting slots, minimal chipping, and long-lasting performance in single or multi-blade configurations.

Product Overview

High-Performance Segmented Sintered Saw Blade

This segmented sintered saw blade is engineered specifically for precision cutting of porcelain, vitrified, glazed, and rustic tiles. It offers high sharpness and consistent performance, ensuring flat cutting slots and minimal chipping during operation. The blade is compatible with a wide range of manual and automatic industrial cutting machines, making it a versatile choice for professional tile fabrication.

Technical Specifications

Compatible Equipment

- Manual cutting machines
- Automatic cutting machines
- Single-head machines
- Multi-head machines

Diameter

150 mm

Compatible Materials

Porcelain Tiles, Vitrified Tiles, Crystal Tiles, Glazed Tiles, Floor Tiles, Wall Tiles, Rustic Tiles
