Overview

Precision Measurement Tool

This versatile vernier caliper is designed for high-precision measurement tasks in engineering, machining, and quality control environments. Offering a measurement range of up to 150mm (6 inches), it provides the reliability needed for professional applications. With a fine resolution of 0.02mm (1/1000 inch), it ensures accurate readings for inside, outside, depth, and step dimensions.

Technical Specifications

Measuring Range (Metric)	150 mm
Measuring Range (Imperial)	6 in
Resolution (Metric)	0.02 mm
Resolution (Imperial)	1/1000 in

Measurement Capabilities

Measurement Modes

- Inside dimensions
- Outside dimensions
- Depth
- Step measurements

Compliance & Identification

Model Number	245011
Origin	China
