

150mW RGY Twinkling Laser Light with 3W RGB LED

This laser light features a red 100mW and green 50mW laser combined with a 3W RGB LED light. The laser emits green at 532nm and red at 650nm wavelengths.

Product Overview

Versatile RGY Laser & RGB LED Hybrid

This entertainment and stage lighting unit combines a 150mW RGY twinkling laser with a 3W RGB LED to create vibrant, dynamic visual effects. Designed for both professional and amateur use, its compact design allows for easy integration into various illumination systems. The synergy between the laser and LED components produces a wide range of colors and patterns, making it an ideal choice for captivating atmospheres in entertainment venues.

Technical Specifications

Laser Power

150 mW

Laser Output

LED Power

3 W

RGB LED

Laser Color Configuration	Red, Green, Yellow (RGY)
