

# 1.5DK-20 Water Pump

This water pump is equipped with a two-pole induction motor and provides continuous service. It features a thermal protector for single-phase operation and is available in both single and three-phase configurations.

## Product Overview

### Reliable Water Solutions

The 1.5DK-20 water pump is engineered for versatility and reliability in both domestic and civil applications. It is ideal for clean water transfer, garden irrigation, and integration with small to medium-sized pressure sets. Featuring a robust, corrosion-resistant design, this pump ensures consistent flow and long-lasting performance in sheltered environments.

## Key Features

### Design Highlights

Corrosion-resistant housing • High-efficiency motor • Compact footprint

### Best For

Domestic Use, Civil Applications, Garden Irrigation, Water Distribution, Pressure Sets

## Operational Requirements

### Compatible Liquids

- Clean water
- Non-chemically aggressive liquids

### Installation Requirements

Must be installed in an enclosed environment or sheltered from inclement weather.
