Overview

Versatile Drilling Performance

This 15m Kelly Bar Rotary Drilling Rig is engineered for efficiency in small-scale integrated construction projects. Designed for versatility, it excels in non-hard soil layers such as silty soil, making it ideal for cast-in-place piles, continuous walls, and foundation reinforcement. With a compact footprint, advanced hydraulic systems, and a focus on operator safety, this rig offers a high cost-performance ratio for demanding site requirements.

Technical Specifications

Suitable Soil Types

- Non-hard soil layers
- Silty soil

Max Drilling Depth

15 m

Drilling Diameter Range

450 - 1500 mm

Features & Safety

Safety Features

- Fall-proof steel cockpit guardrail
- Advanced hydraulic system

Certifications

Quality Certifications

CE • SGS • ISO
