

# 15M Pen Laser Distance Meter

This pen laser distance meter is a compact and precise tool for measuring distances up to 15 meters. It is suitable for interior design, construction, and DIY projects, offering a user-friendly interface and durable construction.

## Product Overview

### Compact Precision Measurement

This pen-shaped laser distance meter offers a professional solution for quick and accurate spatial measurements up to 15 meters. Designed with a portable, user-friendly interface, it provides continuous measurement capabilities essential for builders, real estate professionals, and interior designers. Its durable construction ensures reliable performance for both large-scale construction tasks and precision remodeling projects.

## Technical Specifications

Maximum Distance	15 m
Control System	One-button operation
Measurement Modes	Continuous Measurement, Point-to-Point

## Key Features

### Design Highlights

- Compact pen-shaped form factor
- Digital reading display
- Durable construction
- Portable for fieldwork

## Target Applications

Primary Applications	Construction, Real Estate, Flooring, Remodeling, Interior Design
