

# 1.5V Size D Zinc Chloride Battery

This 1.5V Size D battery provides reliable and consistent performance. It is an extra heavy-duty power source designed for various applications such as flashlights and toys.

## Product Overview

### Reliable Power for Everyday Devices

The 1.5V Size D Zinc Chloride battery is an extra heavy-duty power source engineered for consistent performance. Its robust construction makes it an ideal choice for high-drain household electronics, including portable flashlights and various battery-operated toys. Designed for longevity and sustained output, this battery ensures that your devices remain operational when you need them most.

## Technical Specifications

### Performance Grade

Extra Heavy Duty • Forte Puissance

### Common Applications

- Flashlights
- Toys
- General Electronic Devices

Rated Voltage	1.5 V
Battery Size	Size D / R20
Chemistry	Zinc Chloride
Country of Origin	China
