

15W Oven Light Bulb with E14 Base

This 15W oven light bulb is designed for ovens and other high-temperature appliances. It provides bright, reliable illumination and features a standard E14 screw base for easy installation.

Product Overview

High-Temperature Oven Illumination

This 15W oven lampholder bulb is specifically engineered for high-temperature environments, making it an ideal solution for ovens and similar appliances. Featuring a robust construction designed to withstand thermal shock and vibrations, it ensures reliable and consistent performance. With its standard E14 screw base, installation is straightforward, providing a direct replacement for burnt-out bulbs to maintain clear visibility inside your appliance.
