

15W Recessed LED Downlight

This 15W LED downlight is designed for recessed ceiling installation, providing efficient and directional illumination. Constructed with a durable metal housing and a reflective inner surface, it maximizes light distribution.

Product Overview

High-Efficiency Recessed Lighting

This 15W LED downlight is engineered for seamless recessed ceiling installation, delivering efficient and directional illumination. Its robust metal housing and specialized reflective inner surface ensure optimal light distribution, making it an ideal choice for focused lighting tasks. Designed for versatility, this unit is well-suited for a wide range of indoor environments, including residential homes, commercial offices, and retail displays.

Technical Specifications

Power Consumption

15 W

Power

Installation Type	Recessed
Design Features	Circular Design, Metal Housing, Reflective Inner Surface

Application

Suitable Environments

- Residential
- Commercial
- Retail Spaces
