Product Overview

Versatile Agricultural Power

The 16-22HP Diesel Powered Walking Tractor is a robust and efficient solution designed for small to medium-sized farms, orchards, and gardens. Engineered for versatility, it supports a wide array of attachments including plows, tillers, and cultivators, making it an essential tool for soil preparation and general farming tasks. Its compact design ensures excellent maneuverability in tight spaces, while the reliable diesel engine provides the durability and fuel efficiency required for demanding agricultural operations.
