

16 HP Horizontal Gas Engine

This gasoline engine starts quickly with a simple pull and offers steady, reliable performance for extended operation. The engine features an advanced OHV design, enhancing overall performance.

Overview

High-Performance Horizontal Gas Engine

This 16 HP horizontal gas engine is engineered for reliability and efficient performance. Featuring an advanced OHV design, it optimizes fuel and oil consumption while ensuring long-term durability. The engine is versatile, offering both manual and electric starting options and multiple PTO shaft configurations to suit various industrial and commercial equipment needs.

Performance Metrics

Maximum Output

16 HP

Power

4000 RPM

Speed

Maximum Torque	2.9 kg/m
Displacement	420 cc
Compression Ratio	8:1

Technical Specifications

Starting System	Recoil, Electric (Optional)
Ignition System	TCI
Air Cleaner Type	Dual silent (Semi-dry)

Capacity & Dimensions

Engine Dimensions

Dimension	Value (mm)
Length	490
Width	460
Height	520

Fuel Tank Capacity	6.5 L
Oil Capacity	1.1 L
Net Weight	35 kg

Operational Details

Noise Level	84 dBA
Fuel Consumption	285 g/hp.hr
