

16-inch 48V Electric Commuter Bicycle

This electric bicycle has a unique high-speed motor capable of reaching speeds up to 35km/h. It incorporates sports car design elements with lightweight aluminum wheels and a three-speed intelligent variable speed control.

Product Overview

Urban Commuter Performance

Designed with sports-inspired aesthetics, this 16-inch electric commuter bicycle is engineered for efficient city travel. It features a robust 48V system and an intelligent three-gear variable speed control, allowing for a maximum speed of 35 km/h. With safety-focused enhancements like E-ABS electronic braking and a four-in-one alarm system, it offers a reliable and secure ride for daily urban transport.
