

16 inch Metal Cutting Wheel

This 16 inch (400*3.2*25.4mm) metal cutting wheel is designed for cutting metal. It is a T41 large flat wheel that provides fast cutting speeds.

ADDITIONAL IMAGES

Product Overview

Designed for high-speed performance on metal and inox materials.

High-Performance Cutting Solution

These 16-inch reinforced resin cut-off wheels are engineered for high-speed cutting applications on metal and stainless steel. Designed for both professional fabrication and industrial use, they provide a clean, burr-free finish with exceptional material removal rates. The durable abrasive composition ensures longevity, reducing the frequency of disc changes during demanding projects.

Technical breakdown of dimensions and speed ratings for the 400mm cutting discs.

Dimensions

400 mm

Diameter

3.2 mm

Thickness

25.4 mm

Arbor Size

Performance Ratings

72 m/s

Max Speed

4600 rpm

Max RPM

Wheel Type

T41 Flat Cutting Wheel

Certifications

ISO 9001, MPA Z-04888

Usage & Safety

Applications

Steel Plate Stainless Steel Steel Pipe

Packing

Safety guidelines and application examples for reinforced cutting discs.

Compatible Materials

- Stainless Steel
- Steel Plate
- Steel Pipe
- General Metal

Operation Safety

Strict adherence to safety protocols is required. Always wear protective eyewear, ear protection, a dust mask, and gloves during operation. Do not exceed the maximum RPM, avoid excessive force, and prevent impact during use.

Packaging

Packaging Details

Attribute	Value
Quantity per Box	25 pieces
Gross Weight	24 kg
