

16-Inch Variable Speed Scroll Saw

This scroll saw is designed for intricate woodworking projects. It features a 16-inch throat depth and variable speed control for precise cuts in various materials.

Product Overview

Professional Precision Cutting

The 16-inch variable speed scroll saw is a high-performance precision tool engineered for intricate woodworking and craft projects. Its expansive 16-inch throat depth accommodates larger workpieces, while the variable speed functionality ensures optimal control across diverse materials including wood and plastic. Built for durability and stability, this machine is an essential asset for professional woodworkers and skilled hobbyists alike.

Technical Specifications

Throat Depth	16 inch
Speed Control	Variable

Performance & Safety

Safety Equipment

- Clear blade guard for enhanced visibility
- Durable construction for operational stability

Target User

Professional Woodworkers • Crafters • Hobbyists

Compatible Materials	Wood, Plastic, Soft Materials
